# Rugged, Encapsulated DC/DC Converter for Heavy Duty Applications Delivers up to 1000W Output Power PDC 765 Series

- Field-proven rugged design
- Electronic protection
- Fully encapsulated
- Conduction cooling

The PDC 765 Series fully encapsulated single output DC/DC converter uses field-proven technology to generate up to 1000W output power. It is conduction cooled via a base plate and is rated for full operation in the specified temperature range. The unit is entirely potted with a thermally conductive MIL-spec. silicon rubber compound for resistance against shock, vibration and humidity. The use of components with many years of established reliability and generous headroom results in a high MTBF. The unit is suitable for transportation, mining, oil rigs, military and other harsh environments. Versions to meet EN 50155 railway specifications are also available. Extra options including alarms and a redundancy diode are available on custom versions. The PDC 765 series is manufactured at our plant under strict quality control.

# **SPECIFICATIONS**

#### Input Voltage

48Vdc (42V – 60V) 125Vdc (90V – 145V) Consult factory for other voltages and ranges, including for railway

## **Input Protection**

Inrush current limiting Varistor Reverse polarity protection Internal safety fuse Lower voltage than the specified input min. will not damage the unit

#### Isolation

1500Vdc input to chassis 2250Vdc input to output, 500VDC output to chassis as a minimum

### Standards

Designed to meet EN 60950 and related standards.

# EMI

EN 55022 Class A with wide margins

Switching Frequency 55KHz +/- 3KHz Output Voltages 12Vdc/83A, 24Vdc/41A, 48Vdc/21A or 110Vdc/9A Output is floating; either terminal can be grounded. Consult factory for other voltages

**Redundancy Diode** Not installed. Available on custom versions

Line/Load Regulation <sup>+</sup>/-1% combined from zero load to full load

**Dynamic Response** Max 5% voltage deviation for 10% to 50% load step, with better than 1msec recovery time

#### **Output Ripple / Noise** Better than 0.2% Vrms or 1% Vpp of the output voltage (20MHz BW)

Output Overload Protection Rectangular current limiting with short circuit protection (no hiccup) Thermal shutdown with automatic reset in case of insufficient cooling

Output Overvoltage Protection Double regulator loop **Efficiency** Typically 82% at full load

**Operating Temperature Range** -40 to +60°C cold-plate temperature for full specification Extended temperature range available

**Temperature Drift** 0.03% per °C over operating temperature range

## **Cooling** Conduction cooling via base plate to customer chassis or heat-sink (cold plate)

**Environmental Protection** Fully encapsulated with thermally conductive silicon compound

Shock/Vibration Meets requirements of IEC 61373 Cat 1 A&B and Cat 2 as a minimum.

Humidity 5 - 95% non-condensing

MTBF 130,000 hours at 45 °C Demonstrated MTBF is significantly higher. Indicators None Optional "Output ON" LED available

Control Input None

Alarm Output None Available on custom versions

Package/Dimensions (W x H x L) P600: 155 x 72 x 269mm (6.1" x 2.8" x 10.6") including terminal block and flanges Mounting holes are clear

Weight 4 kg (9 lbs.)

**Connections** 12-pole barrier type terminal block with 3/8" spacing

**RoHS Compliance** Fully compliant

**Warranty** Two years subject to application within good engineering practice.

Enhancements to these general specifications can be accommodated upon request. Specifications subject to change.

Designer and manufacturer of quality converters, inverters, UPS systems, complete rack mount systems and DC-input fluorescent lamp inverters since 1982. Custom or standard. Absopulse is a BABT-approved Facility
